

November 26th 2021, 10:30 – 12:00

Kim Lenschow Andersen

A lecture within “Tectonics – In English”, HSLU T&A, IAR

“At Office Kim Lenschow [...] we work towards an architecture where all layers of history, of time and of materials are explicitly visible and part of the architectural whole. We work with architecture across scales, and feel as much at home in historical environments, as we do in contemporary settings, centering on the importance of the material as the principal carrier of values.” www.kimlenschow.com
